ASBESTOS TRAININGS

COURSE DESCRIPTIONS

OPERATIONS AND MAINTENANCE

This 16 hour course is designed for maintenance workers who may disturb, handle, cleanup or remove small quantities of asbestos containing materials. Whether you currently have an O&M program or need to establish a management plan, this course will provide the necessary information for identifying asbestos, techniques for working with asbestos, locations of asbestos and recordkeeping.

DESIGNATED PERSON

Every school district is required to have a designated person. The course is designed for administrators and maintenance personnel who have an interest in managing asbestos and asbestos records but not disturbing or removing it. The training covers identification of asbestos, recordkeeping, training requirements and control options.

OPERATIONS AND MAINTENANCE REFRESHER

This course is designed for those who have previously taken the 16 hour O&M course and wish to update their skills and knowledge. We will do hands-on glovebagging, repair and cleanup as well as a review of many elements of an O&M program.

ASBESTOS AWARENESS

Awareness training is required by all maintenance and custodial personnel as a minimal training. Material covered includes history and uses of asbestos, health effects, recognition of damaged/deteriorating asbestos and requirements relating to housekeeping.
